

{Orlov}

> **self.to_s**

=> My name is Oleg Orlov. I am a talented senior Ruby on Rails developer with over 5 years of experience involving agile software development practices, analysis, design, implementation and testing Ruby applications. I also love Go and Python, and have frontend skills too.

> █

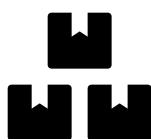

WHAT I CAN

I have experience of building High Load apps with great teams.

I helped to build high load apps, such as People Sap, Van Lanshot

High Load Apps

I am ready to build complex apps with microservices.

For last two years I worked with micro services: Orpiva, People SAP, internal EPAM Projects, Van Lanshot

Micro services

I love to make apps more efficient.

I worked with many apps which required a lot of search requests and calculations, for example:
LPS, Karmasoft, Van Lanshot

Optimizations

I always try to keep my code clean and good. I use linters and security checkers if possible.

My favorite helpers for Ruby are Rubocop, RBP, Brakeman

Clean & Safe Code

30% of my work experience were remote projects.

I worked with client without company with:
Nitroagent, Karmasoft, Chorus

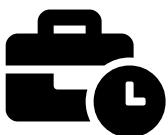

Remote Work

I like to talk directly with client from any country.

In my work I always contact with client via voice and messages. It does not matter freelance or company.

Direct communication

I prefer to use already defined methodologies and do not reinvent wheels.

I try to avoid jobs where "*task should be done yesterday*" and etc. Good planning is the half of success. I like success, not fails.

Business Processes

I always try to suggest the best solutions and make projects better if possible

Almost all projects I worked on smelt at the beginning, there were some code and architecture issues. I always tried to find solution for each case and resolve problem.

Awesome Ideas

WHAT I USE

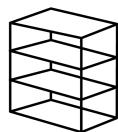

Ruby Backend

Rails

Sinatra

Rack

Puma

RSpec

Cucumber

Unicorn

Phantom

Frontend

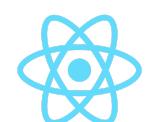

HTML5

ERB

VueJS

React

Redux

AngularJS

WHAT I CREATED

MAY 2018 - NOW

Senior RoR Developer at Karmasoft

Karmasoft Joga Studio

The screenshot displays a weekly studio schedule from Friday, May 4, to Thursday, May 10. The schedule is organized into a grid where each row represents a day and each column represents a time slot. Each slot contains a class name, duration, and a brief description. A 'Book' button is provided for each slot to allow users to reserve spots. The interface includes a navigation bar with tabs for 'Schedule', 'Workshops', 'Instructors', and 'Store'. Top right features 'Sign Up', 'Sign In', 'Staff', 'Share', and 'Tweet' buttons.

(Fri) May, 4	(Sat) May, 5	(Sun) May, 6	(Mon) May, 7	(Tue) May, 8	(Wed) May, 9	(Thu) May, 10

Karmasoft app is joga studio manager. Karmasoft is loaded with powerful features and easy integrations to help you manage your studio better, increase your profit, and be more productive for less.

Features

- Manage all front-desk tasks on one screen
- Create recurring memberships
- Manage staff, payroll and schedules
- Accept all payment types: swipe card, chip card, e-check, NFC, Apple Pay
- Easily embed your schedule, workshops & store on your website
- Sales, Marketing and CRM Tools
- Online Sales
- Recurring Billing
- Staff and Payroll Management
- Smart Terminal
- Website Integration
- Marketing Automation

Used technologies:

- Rails 3
- Rails 5
- PJAX
- SCSS
- Mysql
- Redis

MARCH 2017 - JULY 2018

Mid developer at EPAM

SAP People

The screenshot shows a SAP People profile page for a user named Gabriella Gogl-Gyorgy. At the top, there's a navigation bar with links to Products, Industries, Services and Support, Training, Community, Developer, Partner, and About. A search icon and a user icon are also present. Below the navigation is a header section featuring a circular profile picture of a woman holding a flower, the handle '@tamira', and the name 'Gabriella Gogl-Gyorgy'. On the left, a sidebar menu includes Overview, About, Content, Connections, and Reputation. The main content area displays various statistics: 64 Followers, 13 Following, and a Reputation score of 1758. It also shows 7 Blog Posts published, 89 Tags contributed to, 0 Questions closed, and 18 Answers accepted. A section titled 'What's cooking?' contains a message about Gordon Ramsay Steak in Vegas. The bottom of the page shows a SAP Community link and a date of March 06, 2019.

It is internal SAP social network with questions and answers like Stackoverflow

Features

- Connections (friends)
- Reputation badges
- Trainings
- Blog posts
- Avatar manipulation
- GDPR ready

Used technologies:

- Slim
- CoffeeScript
- SASS
- Redis
- Mongoddb
- Rails 4
- Rails 5

LPS - Plumbing App

The top screenshot displays the 'Company Information' section of the app. It includes fields for Address (1234 S. Main Street), Phone Number (555-5896), E-mail Address (Bob@plumbing.com), Company Website (www.Oplumbing.com), Company Slogan (The best in Town!), and Company Logo (a small thumbnail). There are also options to 'Appear on Top' or 'Appear in Middle'. Below these fields are social media sharing icons for Facebook, Twitter, Google+, LinkedIn, and Pinterest.

The bottom screenshot shows the 'Profit Generator' feature. It asks 'How much will my business be affected?' and provides four sliders for different scenarios: increasing hourly rate, total cost of goods sold, inflation, and accounts payable. It also includes a 'Break Even Hourly Rate' slider. A table compares 'Present' values with 'Future' values across various business metrics, showing the difference in parentheses. The metrics include Total Sales, Total Operating Expenses, Total Cost of Goods Sold, Yearly Net Income, Monthly Net Income, Cost of Goods Sold Per Employee, Hourly Rate, Break Even Hourly Rate, Average Billed Invoice Per Customer, Average Material Sold Per Invoice, and Average Profit per Invoice.

	Present	Future	Difference of: (\$)
Total Sales	\$643,000.00	\$643,000.00	\$0.00
Total Operating Expenses	\$214,000.00	\$214,000.00	\$0.00
Total Cost of Goods Sold	\$311,000.00	\$311,000.00	\$0.00
Yearly Net Income	\$118,000.00	\$118,000.00	\$0.00
Monthly Net Income	\$9,833.33	\$9,833.33	\$0.00
Cost of Goods Sold Per Employee	\$44,428.57	\$44,428.57	\$0.00
Hourly Rate	\$47.84	\$47.84	\$0.00
Break Even Hourly Rate	\$39.06	\$39.06	\$0.00
Average Billed Invoice Per Customer	\$4,374.15	\$4,374.15	\$0.00
Average Material Sold Per Invoice	\$2,115.65	\$2,115.65	\$0.00
Average Profit per Invoice	\$802.72	\$802.72	\$0.00

App helps to calculate prices for plumbing companies. This software has been created for business owners just like you in the service industry. As a business owner you need a way to follow through with results to make sure you not leaving anything out. If you want to fully optimize your sales team, you must create measurable results. And one of the best ways to do so is by using the Flat rate price book app along with the Profit Generator app.

Features

- Create a fiercely loyal customer base
- Raise employee morale
- Weed out the slacker employees
- Employees work at THEIR pace.
- Quickly double-check invoices
- Employees will WANT to sell your business
- Employees create their own bonuses
- Customers will have more confidence seeing the prices. Nothing to hide!
- Employees are paid by the minute, not by the hour, salary or commission
- Confidence knowing that every paid job is pure profit!
- Employees cannot manipulate prices

Used technologies:

- Bower
- Nodejs
- Puma
- Vagrant
- WickedPDF

VR360.com

This is a cool video catalog for VR porn videos with blog, comments, search and etc.

SellBig

The screenshot shows the homepage of the SellBig website. At the top, there's a navigation bar with the SellBig logo, a search bar, and links for 'Create a Store', 'Sign In', 'Register', and a shopping cart icon. Below the navigation is a horizontal menu with categories: ELECTRONICS, MEN, WOMEN, KIDS, HOME, BOOKS, AUTOMOTIVE, SPORTS, HANDMADE, PETS, TOYS & GAMES, and SCHOOL & OFFICE. The main banner features a city skyline background with the text 'DISCOVER Great Brands SUPPORT LOCAL BUSINESSES'. Below the banner, there's a section titled 'HOT DEALS' with four product cards: a digital photo frame, a Canon camera, a Lenovo ThinkPad laptop, and two iPhone 5s. Each card includes the product name, store name, original price, and discounted price. A 'VIEW ALL >' link is at the bottom of this section. Below the deals is a 'TRENDING' section with four small thumbnail images.

The seller has a possibility to create a store, display products in catalogue, manage orders, refund items, chat with buyers and view analytics on the number of sold/viewed products. In the role of admin, it's possible to change banners on homepage and adjust content on static pages using Summernote WYSIWYG editor. On the buyer's side, one can create an account, buy products, track the status of their order, request a refund and chat with sellers.

Features

- Product catalogue with search and filter functionality;
- Customizable profiles for buyers and sellers;
- Chat with sellers;
- Featured product analytics for sellers;
- Analytics on website sales for admin;
- Refund functionality;
- Customizable banners on home page.

Used technologies:

- Ruby on Rails
- ActiveMerchant

JULY 2015 - JANUARY 2016

Lead RoR developer at NitroAgent.com

nitroagent.com

The screenshot shows a web-based real estate application. At the top, there's a navigation bar with a logo, 'Leads' and 'Transactions' tabs, and a user profile for 'Open Соколов'. Below the navigation, there are two buttons: 'Buyer' (highlighted) and 'Listing'. A search bar contains the text 'another2 x'. To the right of the search bar is a 'start typing tags' input field and a small icon. Below the search area, there's a link '+ Create new lead'.

The main content area has a pink header bar labeled 'Hot' and a sub-header '(ready to take action in next 30-60 days... recommend touching weekly)'. Below this, there's a table with columns: 'Name/Phone', 'Client score', 'Last touch', 'Follow-up', and 'Referred?'. A row in the table shows 'test1 test2' with a 5-star client score, 'Today' as the last touch date, and a message from 'Open Соколов' saying 'Some message'. There are buttons for '+ Add referral', 'follow-up', 'Buyer', 'Add tags', and two tags 'ano x' and 'another2 x'.

Below the table, there are several input fields for contact information: 'test1', 'test2', 'email', 'mobile', 'address', 'city', 'UT', and 'zip'. At the bottom of this section, there's a note 'Enter email of person you would like to refer lead to' and a 'Refer' button. To the right, there are two status messages: 'No recent referrals yet.' and 'No referrals yet.'

Real estate web application for closed group of people.

Features

- Manage all transactions
- Easily email property links
- Easily connect with all parties
- Easily view your personal stats
- View calendar of all upcoming deadlines
- Your own free website to capture leads
- Manage all property details
- Record memo/journal entries
- Keep track of all showings
- Manage all tasks
- Full photo tours
- Offer management
- Manage all contacts

Used technologies:

- Rails 4
- Bower
- RVM
- AngularJS
- Bundler
- Slim
- CoffeeScript
- SASS
- Redis
- Puma
- Vagrant

AUGUST 2014 - JULY 2015

Full stack Ruby developer at Clothes Network Ltd.

Scrooge, Web scraper

The Scoooge project, is a webscraper project to collect everything and all knowlegable about locations of storefronts internationally. Normal address information is turned into longitude and latitude using reverse geocoding providers.

Features

- Use Tor proxies to avoid blocking
- Parallel jobs
- Configuration with YAML

Used technologies:

- Apache Thrift
- Bower
- RVM
- DataMapper ORM
- Redis Key-Value Database
- Vagrant
- Docker
- Chef

Orpiva Blog

ORPIVA

Blog for Opiva project

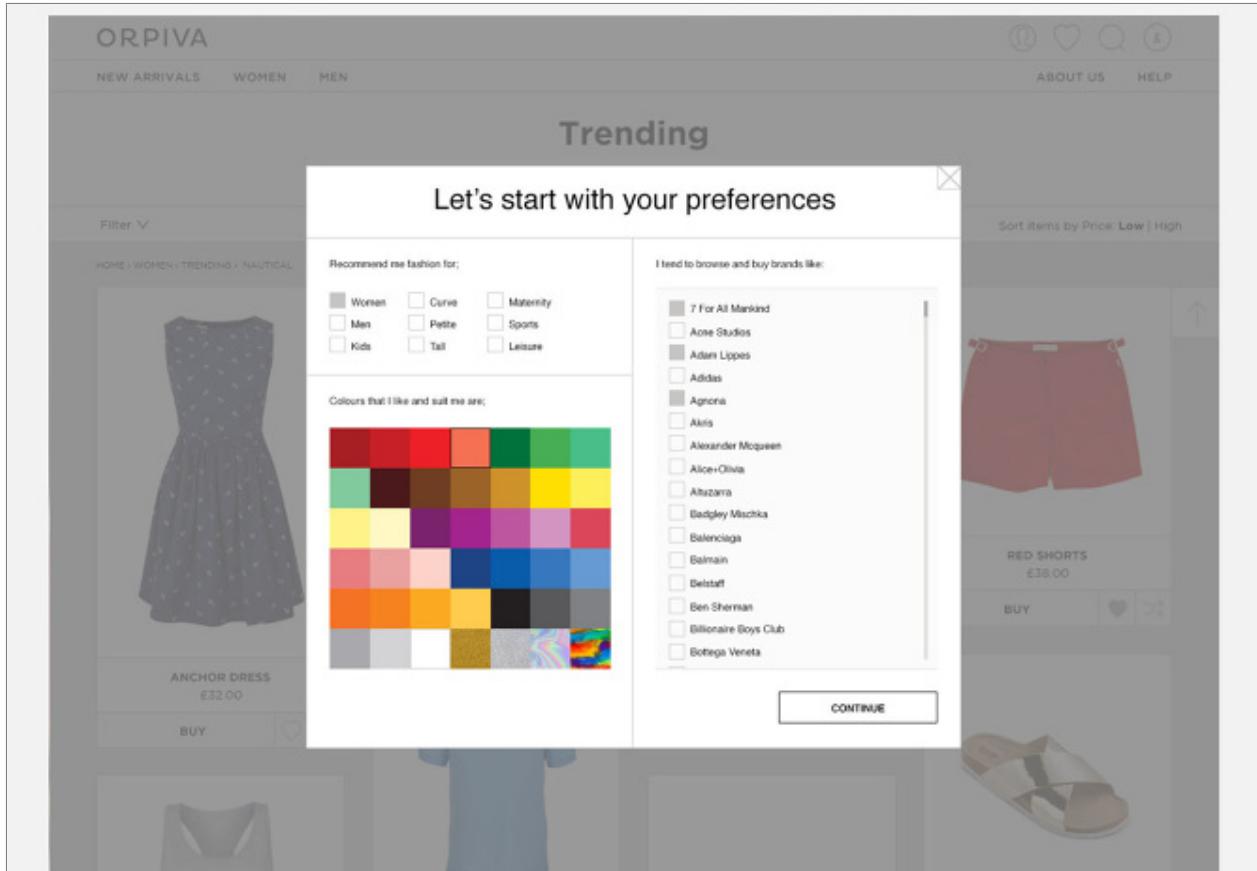

Features

- Blog for Orpiva
- Markdown for writing blog posts
- Images are scaled automatically with ImageMagick

Used technologies:

- RVM
- Bundler
- Jekyll

Orpiva, Fashion Search Engine

ORPIVA is an omni-channel Machine Intelligence Platform empowering brands to monetise their audiences more effectively. Publishers and brands can connect with one of the largest networks of micro influencers globally. Deep Insight Analytics powered by Big Data, Machine Learning and AI provide unparalleled customer understanding and engagement.

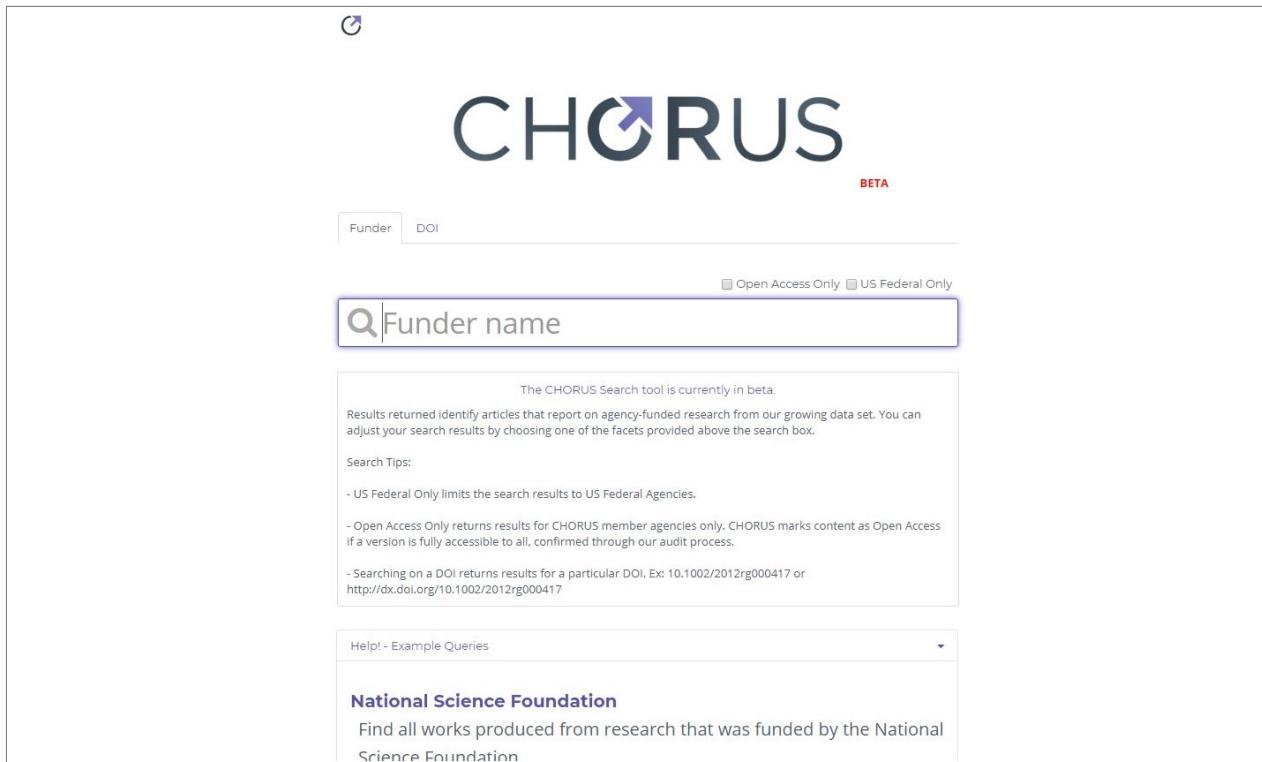

Used technologies:

- Sinatra
- Bower
- RVM
- Bundler
- Datamapper ORM
- Slim
- CoffeeScript
- SASS
- RequireJS AMD
- Redis
- Unicorn
- Vagrant
- Docker
- Chef

JULY 2014 - JULY 2014

Frontend & Backend developer chorusaccess.org

chorusaccess.org

CHORUS leverages existing infrastructure to enable sustainable, cost-effective, and transparent public access to content reporting on funded research. By integrating services and open APIs, CHORUS optimizes funder identification, content discovery and long-term accessibility, compliance monitoring, and dashboard reporting.

Features

- Provides a sustainable solution for government agencies, publishers, research officers, librarians, and authors to make publicly funded research more accessible.
- Makes research outputs easily and permanently discoverable, accessible, and verifiable by anyone in the world.
- Focuses on five core services: Identification, Discovery, Access, Compliance and Preservation.

Used technologies:

- JQuery
- Sinatra

OCTOBER 2013 - JUNE 2014

Junior RoR developer at NitroAgent.com

nitroagent.com

The screenshot shows a web-based real estate application. At the top, there's a navigation bar with icons for Leads, Transactions, and a user profile for 'Open Соколов'. Below the navigation, there are tabs for 'Buyer' and 'Listing'. A search bar contains the text 'another2 x' and a placeholder 'start typing tags'. A 'Create new lead' button is also visible.

The main area is titled 'Hot' and includes a subtitle '(ready to take action in next 30-60 days... recommend touching weekly)'. It features a table with columns: Name/Phone, Client score, Last touch, Follow-up, and Referred?. A specific lead entry for 'test1 test2' is shown, with a client score of 5 stars and a last touch date of 'Today' (07/14/2014). The notes section shows a message from 'Open Соколов': 'Some message'. Below the lead details, there are input fields for 'test1', 'test2', 'email', 'mobile', 'address', 'city', 'UT', and 'zip'. On the right side of the lead card, there are buttons for 'Add referral', 'follow-up', 'Buyer', 'Add tags', 'ano x', and 'another2 x'. At the bottom of the lead card, there are fields for entering a referral email and a 'Refer' button.

Real estate web application for closed group of people.

Features

- Manage all transactions
- Easily email property links
- Easily connect with all parties
- Easily view your personal stats
- View calendar of all upcoming deadlines
- Your own free website to capture leads
